Who We Are

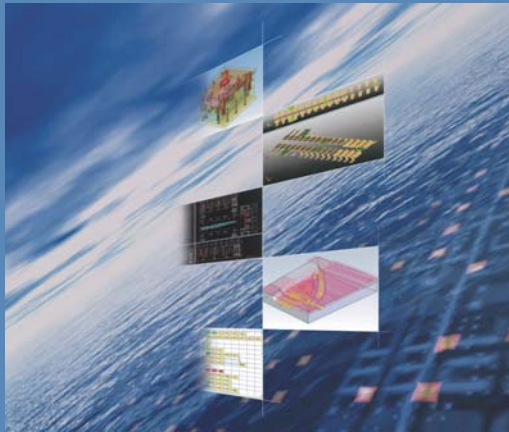

COMPUTER ENGINEERING INC. is a software manufacturer which develops, sells, and supports CAD/CAM systems for mold/die.

The company philosophy "Reliability And Client Satisfaction" continues to inspire us today.

We make every endeavor to create future products, gaining their abilities and performance being more precise to the specifications, smaller in scale and size, lighter in weight, thinner in material thickness, and higher in grade and quality, which will ensure you of the highest quality and bring immediate and fully responsive solutions to your questions unanswered.

Development of Mold/Die Solution Packaged Software

COMPUTER ENGINEERING INC. develops and supports mold/die 2D CAD/CAM system "EXCESS series" that is an industry standard product, mold/die 3D CAD/CAM system "NeoSolid series", and mold/die process control system "AIQ". We provide internationally competitive solutions by supporting Korean and Chinese versions as well as English versions.

What We Do

Our product lineup enables mold/die manufacturing companies to maximize production capacities.

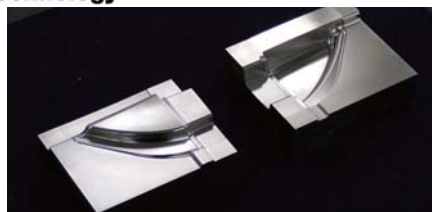

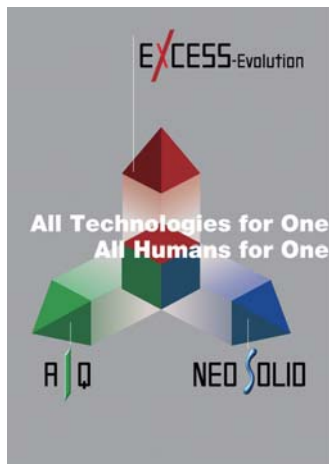

Now we have All-in-One concept and Hybrid concept that 2D and 3D CAD/CAM systems work together.

In addition, we develop a production management system for controlling overall process in mold/die manufacturing. The feature of this system is linkage with CAD/CAM data.

As mentioned above, not just studying CAD/CAM systems, we also aim to become an all-around solution manufacturer that helps people engaged in mold/die manufacturing to maximize their productive efficiency.

All Technologies for Humans

Software and support systems that COMPUTER ENGINEERING INC. develops are all for customer satisfaction. Also, our software can create a mold/die by which products that make consumers happy are manufactured. It is our hope that we continue to develop software which satisfies and pleases people.

Open New Era in Mold/Die

Support

We are delighted to develop and produce high-quality products and believe that our support to your needs is the foremost importance to us when the world of industries and businesses advances rapidly at a daily level.

Product

“System especially for mold/die industries which adapts to various scenes” is the greatest strength of our products. We continue to lead the world manufacturing industry with you.

Development

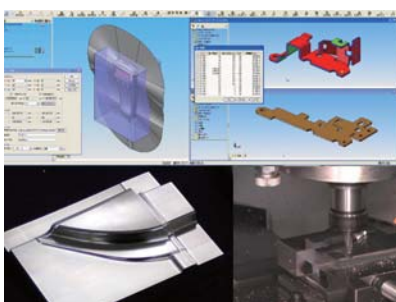

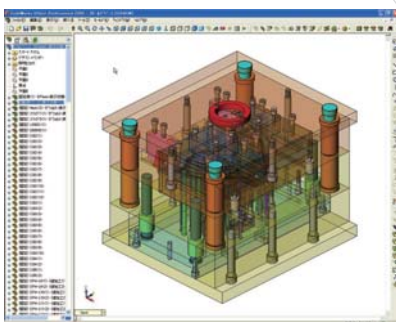

We provide solution packaged software that enables customers to maximize their contributions in the “Ultra-” fields, such as “Ultraprecise”, “Ultraminiature”, “Ultralight”, and “Ultrahigh-Quality”, to the world.

Business

The manufacturing technology is rapidly advancing and evolving globally. As a leading mold/die solution manufacturer, we keep a clear vision on global marketing to facilitate rich and smooth overseas operations for our clients.

Event

We actively participate in the trade shows for manufacturers and energetically hold community-based private exhibitions to promote communication with our customers.
